

ASIA PACIFIC LEADERS MALARIA ALLIANCE MALARIA ELIMINATION ROADMAP

TO SAVE MORE THAN A MILLION LIVES AND
DELIVER US\$300 BILLION IN BENEFITS

THE ROADMAP: A PATHWAY TO ACHIEVING REGION-WIDE ELIMINATION

The Roadmap envisages three five-year phases for Asia Pacific malaria elimination. In the first phase, six countries that have successfully reduced the disease to low levels should achieve elimination. This is the easiest goal. Simultaneously, we need to rapidly scaling up and sustain our effort in the fighting to address multi-resistance regions already present. If these national malaria plans are adequately supported, low-risk countries will be able to achieve elimination by 2025, contributing towards more than four billion of a million lives being saved. By the end, 50% of the region's countries will be malaria free, offering an economic boost on the improving economic situation. This will require improved service delivery in some of the region's most remote areas and communities. Within this phased approach, there is scope for a number of countries to achieve their goal of zero or to expand to their own and their neighbors where malaria remains a major
